

BB-SCR Updates

BB-SCR April Updates - Improved User Experience

Dear User

At Black Boots, we are committed to ensuring the task of delivering a Safety Case Report is as effortless as possible.

This weekend, BB-SCR is receiving an update, aimed at improving your experience and enhancing risk management capabilities.

What's New:

- **Enhanced Field Guidance:** We've added helpful hints to many fields within BB-SCR, making it easier than ever to ensure you're entering the correct and complete information.
- **Mitigation of Risks:** The "Actions" section in risk assessments and maintenance & inspection has been improved to capture specific information about completed or scheduled actions and how they have or will be mitigated. This enables this information to be captured within the draft safety case report, showing both risks and mitigations for completed actions as well and the existing ongoing works.

We appreciate your continued reliance on BB-SCR for your safety case reporting needs. As always, if you have any questions or require assistance with the system, please don't hesitate to contact our support team at [**support@blackboots.uk**](mailto:support@blackboots.uk).

And look out for a further announcement coming soon on our FREE online training course on Safety Case Preparation.
