

BB-SCR Updates

BB-SCR March Updates - Important BSR Guidance Update to BB-SCR

Dear User

As you know Black Boots are committed to ensuring that all products are compliant with both government legislation and guidance.

As you may have seen this week, the Building Safety Regulator released details of the application, assessment and 'all reasonable steps' process for Building Assessment Certificates for high-risk residential buildings. As a result of this, Black Boots will be making significant changes to the BB-SCR product to ensure it is remains compliant to this latest set of guidance.

To ensure you can continue to use BB-SCR whilst this update is implemented, it is necessary to take the following actions

1. BB-SCR will be taken offline between 15:00 Wednesday 6th March 2024 and 06:00 Thursday 7th March 2024 to implement an interim update allowing it's use whilst further development is undertaken.
1. BB-SCR will not permit you to generate a draft safety case report between 06:00 Thursday 7th March 2024 and 06:00 Monday 18th March 2024. You can still upload all your safety case information to existing and new reports, however the Generate Report button will be disabled until the new BSR compliant release is ready.
1. On Monday 18th March 2024, it will be necessary to edit and amend all sections of all reports generated up until this point, adding information into the new sections to ensure compliance. ALL sections will need to be edited and then re-saved to implement the new change. This is a one off function and only applied to reports which have not yet been completed.

This is a major release to ensure your safety case report remains compliance to the new BSR guidance. Thank you for your patience while we implement the changes and please let us know if you have any questions or require any support.
