

BB-SCR Updates

BB-SCR November Updates Week 2 – Risk Assessments

Dear User

We're committed to continuously enhancing BB-SCR to better serve your needs. As part of our weekly update schedule, we want to share the upcoming improvements.

The second updates will go live on the **weekend of the 23rd November** and will include:

- **Risk Assessment AI Update** - BB-SCR's AI has been further refined to specifically assess risk assessments in five uniquely differently ways. This will better align the identified risks to the specific risk assessment, which will in turn enhance the content of the safety case report.

This AI update will further enhance the functionality of BB-SCR, delivering improved performance and more refined outputs.

What does this mean for you?

For any reports currently underway, you'll need to review and complete any new required fields. We understand this may be an adjustment, however these improvements are designed to keep your reports compliant with the latest regulatory expectations.

Thank you for your support and understanding as we work to enhance BB-SCR to serve you better. If you have any questions or need assistance, please don't hesitate to reach out to our support team.
